The OSSIX® PLUS resorbable collagen membrane has been proven with over 15 years of clinical history and over 90 peer reviewed publications to:

- Maintain barrier effect for 4-6 months
- Resist degradation when exposed
- Provide sufficient time for bone regeneration of osseous defects (ossification)

OSSIX® PLUS uses proprietary collagen cross-linking technology called GLYMATRIX® to cross link collagen molecules using sugars. GLYMATRIX® is based upon the naturally occurring glycation process in the human body.
